

ProCoat

Complex surface treatments bid complete, applied with precision, and turned around quickly

ProCoat is a full-service finishing company specializing in applying complex surface treatments. We are broadly recognized for our ability to economically mask complex and intricate surfaces and create fixtures for efficient, high quality processing of the most critical parts. Our services include cleaning, inspection, shot peen, anodizing, plating, painting, and polishing.

ProCoat's proprietary plating and painting processes and controls allow us to consistently deliver uniform, close tolerance surface treatments. And we do not stop there. Whether it's an industry leading position in an established process such as precision CAD plating, or a newer process such as zinc-nickel plating, we strive to get better. We are

even taking painting to the next level, applying automation and feedback based controls to achieve better thickness control and quality.

Striving for the shortest turnaround times in the market is another ongoing effort at ProCoat. We continue to invest in technology, apply LEAN/Six Sigma/TOC principles, and work to streamline and automate our upfront processes to convert your surface treatment requirement to a finished part in the shortest time possible. [Please see the reverse side for additional information on the scope of our services and approvals.](#)

- Complex plating and masking a specialty
- Automated order setup and job status
- Zinc-Nickel per BAC5736

ESSENTIAL SERVICES

- ▶ Anti-Static Coatings
- ▶ Boric-Sulfuric Acid Anodizing
- ▶ Cadmium Plating
- ▶ Chromic Acid Anodizing
- ▶ Copper Plate / Copper Strip
- ▶ Dry and Wet Abrasive Paint Stripping
- ▶ Dry-Film Lube per BAC 5811
- ▶ EMI/RFI Shielding
- ▶ Nital Etch
- ▶ Part Marking
- ▶ Penetrant and Magnetic Particle Inspections
- ▶ Polish and Grain Finishing
- ▶ Shot Peening
- ▶ Stainless Steel Passivation
- ▶ Sulfuric Acid Anodizing
- ▶ Zinc-Nickel Alloy Plating
